

## Lab 4.05 - Debugging Practice

### 1. Read through the following code

```
def print_numbers(list):  
    for i in range(1, len(list)+1):  
        print(list[i])  
  
num_list = [1, 2, 3, 4, 5, 6]  
print_numbers(num_list)
```

#### In your notebook

Write down any bugs that you see in the program

### 2. Read through the following code

```
def swapping_stars():  
    line_str = ""  
    for line in range(0, 6):  
        for char in range(0,6):  
            if line % 2 == char % 2:  
                line_str += "*"   
            else:  
                line_str += "-"  
    print(line_str)
```

#### Continue in your notebook

Write down any bugs that you see in the program

### 3. In your console

Type in and fix the above two programs.
